

Whereas CSUCI is the Green Campus, both in name and in spirit, and is committed to preserving our environment for generations to come,

Whereas the natural and architectural beauty of our campus is part of our identity and culture,

Whereas the population of our campus will increase rapidly and soon surpass our parking capacity,

Whereas the University is the birthplace of innovation and a model for the community,

Be it resolved that it is the will of the Academic Senate that CSUCI phase out the on-campus parking of all passenger vehicles, with limited exemptions, and that CSUCI work in conjunction with the City of Camarillo and the Ventura County Transportation Commission to effectuate practical off-campus parking solutions for our students, faculty, staff, and administrators.
